

WellRithms 2026

Medical overbilling costs payors and patients billions of dollars every year.

A close-up photograph of a red pen with a silver tip, resting on a white surface. Several large, bold, black checkmarks are visible, some of which are partially filled with red ink. The image is partially obscured by a large red rectangular overlay on the left side.

RECON & DISPUTE MANAGEMENT

WELLRITHMS SOLUTION

OUR RECON & DISPUTE MANAGEMENT

In group health, accurate reimbursement decisions are frequently challenged by providers through reconsideration requests, payment appeals, and formal disputes.

These challenges are not exceptions. They are a normal part of the reimbursement process, particularly for out-of-network medical bills and claims or cases involving non-standard pricing methodologies.

Recon & Dispute Management exists to ensure accuracy does not stop once a reimbursement recommendation is issued. From initial repricing through final resolution, WellRithms manages provider pushback directly, ensuring recommendations remain consistent, supported, and clearly explained without shifting the burden back to the plan.

CORE COMPONENTS

RECONSIDERATION SUPPORT

Reconsideration requests are reviewed and responded to by WellRithms specialists using documented, data-driven rationale tied to the original recommendation.

PROVIDER COMMUNICATION MANAGEMENT

All provider communication is handled on your behalf, eliminating back-and-forth with billing departments and reducing administrative burden.

WHY ACCURACY CHANGES THE DISPUTE CONVERSATION

Most reimbursement disputes do not hinge on volume or persistence. They hinge on whether the original recommendation can be explained clearly and supported at the line level.

Recon & Dispute Management does not rely on negotiation tactics or escalation strategies. Responses are grounded in accurate bill or claim review, consistent methodology, and documented rationale.

When recommendations reflect reality, disputes require less back-and-forth, resolve faster, and are more likely to conclude without concession. Accuracy becomes the reason decisions stand, not something that must be defended repeatedly.

MEDICAL DISPUTE SUPPORT

Formal disputes are prepared and defended. When disputes escalate, WellRithms prepares structured responses supported by billing expertise, clinical oversight, and pricing documentation.

PROCESS AND DEADLINE MANAGEMENT

All reconsideration and dispute timelines are actively tracked and managed to ensure responses are timely, complete, and procedurally compliant.

LET'S TAKE A LOOK

Start with a single medical bill or claim.

Whether you're addressing an out-of-network dispute or responding to provider reconsideration requests, Recon & Dispute Management can help clarify whether the original recommendation was accurate and how best to support it.

THANK
YOU
