

WellRithms 2026

Medical overbilling costs payors and patients billions of dollars every year.

AMBULANCE REVIEW & REPRICING

WELLRITHMS SOLUTION

ABOUT AIR & GROUND AMBULANCE REPRICING

Hidden fees, unbundled services, and unsupported add-ons frequently drive billed amounts far beyond what is reasonable or defensible. These issues persist across both in-network and out-of-network ambulance claims, often surviving initial claim processing without meaningful review.

In many cases, ambulance services fall outside negotiated network rates or established reimbursement benchmarks. Without focused review, excessive reimbursement becomes normalized and difficult to challenge after payment.

Air & Ground Ambulance Repricing exists to bring accuracy and discipline to these high-risk medical bills and claims. By auditing ambulance charges at the line level and repricing services based on objective reimbursement standards, WellRithms ensures recommendations reflect what the transport should reasonably cost, not what was billed.

CORE COMPONENTS

LINE-LEVEL AMBULANCE BILL AND CLAIM AUDIT

Each charge is reviewed to confirm pickup and drop-off locations, mileage accuracy, and appropriate service levels.

UNBUNDLING AND ADD-ON REVIEW

Inclusive services are identified and corrected to prevent separate billing of charges that should not stand alone.

WHY AMBULANCE BILLS REQUIRE CLARITY

Ambulance billing leaves little room for interpretation once the facts are examined. Either the transport was necessary, the service level was appropriate, and the charges were supported, or they were not.

Air & Ground Ambulance Repricing replaces assumption-driven payment with line-level clarity. Recommendations are grounded in accurate bill and claim review and validated against objective reimbursement standards, allowing them to remain consistent when examined by providers, auditors, consultants, or plan sponsors.

When inflated and unsupported charges are corrected, significant reductions are frequently observed, with **savings of up to 80% off the billed amount on eligible ambulance medical bills and claims**. More importantly, reimbursement recommendations remain defensible without negotiation because they reflect reality.

MEDICAL NECESSITY ASSESSMENT

Transport services are evaluated to confirm the level of care billed aligns with clinical necessity and supporting documentation.

OBJECTIVE REPRICING

Charges are repriced using objective reimbursement standards to align payment with what the transport should reasonably cost.

LET'S TAKE A LOOK

Start with a single ambulance medical bill or claim.

Whether air or ground, in-network or out-of-network, Air & Ground Ambulance Repricing can help clarify what should have been reimbursed and why.

In many cases, accuracy alone is enough to change the outcome.

THANK
YOU
