

WellRithms 2026

Medical overbilling costs payors and patients billions of dollars every year.

COMPANY OVERVIEW

ACCURACY AND FAIRNESS BEFORE PAYMENT

**WELLRITHMS
2026**

WELLRITHMS' PAYMENT INTEGRITY SYSTEM ENSURES **ACCURACY AND FAIRNESS BEFORE PAYMENT.**

WHO WE ARE

WELLRITHMS IS A HEALTHCARE REIMBURSEMENT AND PAYMENT INTEGRITY ORGANIZATION FOCUSED ON BRINGING FAIRNESS AND ACCURACY TO MEDICAL BILLS AND CLAIMS.

WellRithms operates in environments where medical billing decisions are complex, highly scrutinized, and regularly challenged. In these settings, recommendations either reflect reality or they do not. When they are accurate, they hold.

We are a healthcare reimbursement and payment integrity organization focused on bringing fairness and accuracy to medical bills and claims across Group Health, Workers' Compensation, and emerging markets. Our work is built on the understanding that trust is not created by confidence or positioning, but by recommendations that hold up when examined by parties with competing interests.

Our role is not to manufacture outcomes or rely on broad assumptions. It is to evaluate medical bills using real data, clinical documentation, and physician expertise with direct knowledge of coding, billing, and procedural accuracy. We focus on what the billing actually supports, not what can be negotiated into place later.

When recommendations are accurate, they do not require negotiation. They stand on their own. WellRithms stands behind its work, and that standard has been proven repeatedly under formal review, including in litigation where our positions have been upheld. Accuracy is not a claim we make. It is the basis on which our decisions endure.

ACCURACY HOLDS UP

When medical billing decisions are examined by providers, payors, regulators, and courts, only one question ultimately matters:

DOES THE RECOMMENDATION REFLECT REALITY?

At WellRithms, every medical bill is evaluated using clinical documentation, coding standards, and physician expertise grounded in real-world billing practices.

Our role is not to negotiate outcomes or rely on assumptions. It is to determine what the billing actually supports.

When that work is done correctly, the result does not need to be defended aggressively.

It stands on its own.

Payment Integrity.
Proven Under Scrutiny.

THE PROBLEM WE ADDRESS

Across healthcare markets, medical bills and claims are frequently processed under pressure. Speed and scale are prioritized, while accuracy and consistency can become harder to maintain.

In that environment, billing outcomes may appear acceptable on the surface but fail when examined more closely. Patients, providers, and organizations are left navigating disputes, rework, and uncertainty when the underlying accuracy of a bill has not been clearly established.

The issue is not effort or intent.

It is clarity.

OUR OPERATING STANDARD

At WellRithms, our standard is fairness and accuracy for all parties involved.

We focus on revealing what is supported by clinical documentation, coding, and billing logic, without exaggeration or negotiation-driven distortion. Our work is grounded in consistency and restraint, with the expectation that decisions will be reviewed by stakeholders removed from the original context.

When accuracy is clear, outcomes do not need to be defended aggressively. They stand on their own.

COMPANY OVERVIEW

3

HOW THIS APPLIES ACROSS MARKETS

While healthcare markets differ, the principle remains the same.

Whether addressing Group Health, Workers' Compensation, or Auto medical bills, WellRithms applies a consistent approach:

- › Clarify what the billing supports
- › Apply standards consistently across similar scenarios
- › Ensure decisions can withstand real-world scrutiny

This allows organizations to move forward with confidence, knowing decisions reflect fairness and accuracy rather than interpretation or leverage.

4

ACCOUNTABILITY THROUGH ACCURACY

Accountability is a natural result of clarity.

When medical billing is accurate and fair, standing behind decisions becomes straightforward. Disputes are reduced, confidence increases, and trust is strengthened across patients, providers, and organizations.

At WellRithms, accountability is not claimed.

It is earned through accuracy.
