CLASSIFICATION, EDITS & REVIEW™

In-Network Review | Clinical Edits

THE FOUNDATION OF EVERY WELLRITHMS REVIEW

Network claims are reviewed line-by-line using WellRithms' Classification, Edits, & Review™ (CER) system, complementing PPO network discounts.

- **Classification:** Place of service and provider type are commonly misclassified, causing overpayment errors.
- **Edits:** National billing standards do not allow certain services to be billed separately. A network discount on a service that is not billable generates overpayment.
- **Review:** A physician review of the services rendered will ensure that claims are coded correctly. Don't pay for services that were never performed.

INPATIENT ITEMIZED BILL REVIEW | BRAID™

In-Network Review and Repricing

A PARTNERSHIP BETWEEN CLINICAL REVIEW AND AUTOMATION

WellRithms' Itemized Bill Review, BRAID™, stands for Bill Review, Artificial-Intelligence Driven. BRAID™ combines advanced automation with expert clinical review to ensure accurate, defensible repricing of medical bills that saves both time and money.

- **Physician-Led Reviews:** BRAID™ employs experienced physicians for in-depth reviews, not just clinicians, ensuring a higher level of medical expertise.
- **Faster Turnaround:** BRAID™ processes claims within 48 hours and rarely requires medical records, unlike other review systems that often rely on them and slow down the process.
- **Provider Profiling:** BRAID™ identifies problematic providers and develops profiles, ensuring faster and more consistent reviews in the future.
- **Proven Results:** Our rules engine continually learns and improves with every bill, providing increased accuracy and reliability.

Top three reasons for reductions;

- > Services within the revenue codes were denied as inclusive to the inpatient procedure.
- > Not reimbursable in an inpatient setting.
- > This service is incidental and is included in the primary procedure.
